The founder of the company, Hubert Schmitz, established a weaving mill for special fabrics in Heinsberg in 1887. In the course of four generations, the enterprise developed into the competent German manufacturer of S-GARD® protective clothing.

The quality management system certified according to ISO 9001 as well as the additional certification according to Article 11B of the European guideline "Personal Protective Equipment" ensure, together with a dedicated team, that the high S-GARD® quality requirements are met.

With our S-GARD® range, we have many quality products available that are suitable in practice and which have an innovative finish. The models for professional use have been developed and manufactured under the aspect of highest protective effect whilst offering best wearing comfort.

High-Visibility Clothing

# Garments for the ambulance Service

Daily service at the aid of people plus the operations and situations associated with this demand special **high-quality protective clothing**. **S-GARD® products** will meet your needs.

The **fluorescent upper material** is offered in two different qualities:

The **Trevira CS-warp knit fabric** is the proven, classical top web for protective clothing for the ambulance service. It meets all the requirements of the GUV, it is robust and at the same time very air-permeable – adding largely to hygiene.

**SoftTouch** SoftTouch is a new development by the firm of **S-GARD®** made specially for the ambulance service. The highly durable, yet at the same time supple and soft polyester fabric provides more **wear comfort**, more **freedom of movement**, thus more **acceptance**.
